### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I in the reply filed on 10/19/2007 is acknowledged.

Claim 8 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/19/2007.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification never sets out the invention as claimed. The first description of any catheter begins at page 161, and never describes adventitial delivery, or an associated adventitial injection device. Further, the specific drugs used in combination with the catheter are never described for use with the catheter. One of skill in the

Art Unit: 1615

relevant art would never have discerned that the inventors were in possession of a catheter based device as claimed from the instant specification.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent no. 5,811,447 (US'447).

US'447 discloses a catheter based device which can deliver drugs such as rapamycin, NSAIDS, steroids, metabolic drugs and anticoagulants such as heparin and other agents . (see Description) Delivery to the interstitial space between cells is specifically recited. However, it must be noted that once the reference teaches the delivery of the same agents with the same device, the delivery region is viewed as an inherent function of the device. The instant device is anticipated by US'447.

Claim 7 is rejected under 35 U.S.C. 102(b) as being anticipated by Nikol Et al (Gene Therapy, 1999, Volume 6, Number 5, pages 737-748).

The article by Nikol et al disclose the delivery of a gene by catheter injection device which anticipates the instant claim.
